J. Hauser GmbH & Co. KG

Optische Erzeugnisse

- Established: 1921
- Employees: 30

Service portfolio:

J. Hauser GmbH & Co. specialises in the fabrication of optical precision products by moulding technology. In its highly modern manufacturing facilities it also produces fine optical components in all available optical glasses on the basis of drawings or specimens. The company also possesses great expertise in the manufacture of precision spheres. A production process developed within the company enables extremely precise fabrication of full spheres, hemispheres and spherical segments from all technical and optical glasses, quartz, silicon, ceramics and metal.

Products and services:

- Aspherical, spherical and toric lenses, blank moulded on one or both sides
- Spherical and cylindrical lenses, ground and polished
- Precision spheres, hemispheres and spherical segments for optical and technical applications, diameters from < 0.5 to 100 mm, diameter accuracy ± 0.0005 mm
- Moulded glass components
- Plane and concave mirrors
- Prisms
- Colour filters

Fields of application:

- Fibre optics
- Lighting
- Laser optics, micro-optics
- Medical technology / endoscopy
- Sensor technology
- Metrology
- Calibration technology

Specifics:

Permanent innovations, close cooperation with customers and continuous development of the production processes ensure a good position in the international competition.
