KLA-Tencor MIE GmbH

- **Established: 1920**
- **Employees: 253**
- **Service portfolio**

KLA-Tencor MIE GmbH is part of the globally operating KLA-Tencor concern, the market leader in semiconductor process control. KLA-Tencor supplies key technologies which are used by all leading semiconductor producers and many research institutes throughout the world. The company develops, produces and sells innovative products for process control in the semiconductor industry, the mask industry and other related industries.

The product portfolio comprises defect identification and classification systems, high-performance microscopes and OEM modules, also mask metrology systems used for the measurement of structures and positions on masks in the semiconductor industry.

- **Products and services**
- Macro defect detection systems
- Defect review systems
- Defect classification systems
- High-performance microscopes and OEM modules
- Mask metrology systems

- **Fields of application**

- Process control in the semiconductor and mask industries and related industries

- **Specifics**

- The German Industry's 2002 Innovation Award
- Second place in the category "World Market Leader" in the "Hessen Champions" 2007 competition
- Achievement of the second stage in the competition "Großer Preis des Mittelstandes"
- "Supplier of the Year 2007" at the AMTC in Dresden
