

PMS Optik AG

Short description:

PMS Optik AG, founded in 1984, produces fine optical components of any kind, primarily in small and medium lots and chiefly according to customer specifications.

In 2003 we achieved sales in the range of € 2 million with a staff of 12.

PMS Optik has been certified according to DIN EN ISO 9001:2000 since 2003.

Product range:

- UV and DUV optics for use in high-power lasers
- complete sets of optics for ophthalmological surgery laser systems (193 nm)
- laser resonator optics made of fluoridic crystals for excimer lasers
- laser mirrors (low absorption and low light scattering) with minimum wave front deformation
- cemented prism systems for beam folding or beam splitting
- specialized optics with unusual specifications (passes, angles, cleanliness)
- prototypes and component part manufacture
- small and medium lots held in store and available on request

Developments:

- optics-specific testing and measuring techniques
- production monitoring and continuous improvement of UV coatings from different suppliers
- internet-based access to product documentations

Services:

- advice in optical specification
- optical calculation
- customized assembly, labelling and packaging
- component part tracking through a production database
- component part measurement with certificate (CoC)
